PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1D

25X1D
25X1D

An ammunition storage area is located 10 kilometers (km) west-southwest of Vyshkov (52-29N 031-41E) on the north side of the Vyshkov-Gomel rail line (Figure 1). The installation is served by a spur from the main rail line and has an all-weather primary road connection with Gomel. Military installations are located in Gomel, 40 km west.

[redacted]
[redacted] A support area located outside the main entrance to the installation contains six barracks and two administrative buildings.

25X9

25X1

The area was covered by 10 [redacted] missions between [redacted]

25X1

[redacted] Comparative analysis reveals an increase in the level of activity between [redacted]

[redacted] Significant changes since [redacted]

[redacted] include the addition of 19 ammunition storage buildings and the [redacted] storage bunker.

25X1D

25X1D 25X1D 25X9

This installation (Figures 2 and 3) covers approximately 720 acres, is secured by a double fence, and includes 39 unrevetted ammunition storage buildings. Heavy foliage precludes the identification of additional buildings. [redacted]

[redacted] sep-

DESCRIPTION OF INSTALLATION

Railroad Service

A rail spur from the Vyshkov-Gomel double-track rail line extends northeast into the installation.

Road Service

The installation is served by a primary, all-weather road which runs parallel to and north of the rail line and west to Gomel.

Administrative and Troop Housing Areas

Area D (Figure 3) includes two administrative buildings, six barracks, and four support buildings. Track activity throughout this area indicates occupancy of all the buildings, which are used to provide support for the storage area. Heavy foliage precludes identification of additional buildings.

Ammunition Storage Areas

Area F includes 39 unrevetted 190-by 80-foot ammunition storage buildings.

Nineteen ammunition storage buildings have been completed since [redacted] Configuration of this installation indicates additional buildings may be present, but they cannot be confirmed because of the heavy foliage.

25X9

An adjacent internally secured area contains an earth bunker [redacted] in diameter for [redacted] [redacted] however, drive-through capability cannot be determined. All ammunition storage buildings have direct access to an elaborate network of internal roads.
